

ISTANBUL METRO

Strategically located between the key markets of Europe, the Middle East and Asia

Equinix helps companies accelerate business performance by connecting them to their customers and partners inside the world's most networked data centers.

Turkey, Europe's sixth-largest economy with a population of 78 million, is also Europe's fastest-growing economy. The country is on target to become the continent's second-largest manufacturing hub. In addition to rapid economic growth, Turkey's populous nature has led to a widespread adoption of mobile technologies, a rapid increase in video streaming and more than 40 million active social media users. These factors have not gone unnoticed. A growing number of major international companies, including Microsoft, IBM and Coca Cola, are establishing large presences in Turkey.

Istanbul is the business capital of Turkey, located at the crossroads of Europe and Asia, and the ideal location for a world-class data center. Equinix is Turkey's only major independent international retail data center provider, and our **International Business Exchange™** (IBX®) data centers are the most densely connected. We give Istanbul customers a range of premium interconnection options within a diverse and rapidly growing digital ecosystem.

Both data centers are located in the heart of the city in close proximity to major business districts, offering customers unrivalled resilience and connectivity across southeastern Europe, Africa, the Middle East and Asia. They feature significant colocation opportunities, with 25,000+ square feet (2,300+ square meters) of colocation space. Other benefits include scalable technical space and fully redundant power supplies to ensure operational resiliency and advanced security.

Why choose Equinix?

- Interconnect with 165+ of the world's leading organizations
- Optimize communications and exchange data with enterprises, content providers, clouds, networks and internet service providers
- Leverage **Performance Hub™** to enable next-generation wide area network (WAN) architecture for secure and highly reliable connectivity to 15+ network service providers and 70+ **cloud and IT service providers**
- Provide cloud and internet services quickly and easily to Equinix-deployed customers
- Maximize the use of digital channels with access to the main media hubs in Eastern Europe, Asia and North Africa
- Connect with top **content digital media** (CDM) companies to reduce latency and help improve user experience
- Meet any and all compliance requirements. Equinix IBX data centers enable customers to comply with quality (ISO9001), security (ISO27001), environment (ISO14001/50001), health & safety (18001) and other industry-specific compliance requirements. IS2 conforms to the highest level of earthquake resistance under TEC 2007 (aligned with US seismic code ASCE 31/41)

Connectivity options through Equinix

Where both Campus Cross Connect and Metro Connect™ are available between a pair of sites, only Campus Cross Connect should be provided.
