

MIAMI METRO

HOME TO THE PRIMARY NETWORK EXCHANGE POINT BETWEEN THE U.S. AND LATIN AMERICA

Equinix Miami data center

Equinix helps companies accelerate business performance by connecting them to their customers, employees and partners inside the world's most interconnected data centers.

Our Miami International Business Exchange™ (IBX®) data centers are in the heart of one of the world's largest internet exchange points and serve as major communications gateways to commercial centers in Latin America, the Northeastern U.S. and Europe. It is a business hub to 590+ customers; customers can choose from a broad range of network services from 135+ network service providers. The MI1 data center is located in downtown Miami and hosts a broad choice of networks and other interconnection partners.

Miami is ranked one of the top-five most connected cities in the world and is a key destination point for submarine cable systems, which means it offers superior interconnection and secure routes to global markets. Our facilities provide access to leading Latin American networks, reducing latency to the South and Central American markets. Miami also provides direct access to and from Brazilian markets through the Monet subsea system via a cable landing station located inside MI3. It is a growing metro, boasting a highly diverse economy and attracting huge concentrations of commerce, finance, tourism, media and healthcare businesses.
